

Dear Customer, Suppliers & Business partners

During the last weeks we have all been affected by COVID-19, which has gradually spread to many countries all over the world.

STØTEK A/S daily follows the Danish & European authorities and recommendations with the respect to the handling of Corona virus.

We will keep being informed about the situation and will of course immediately inform you of any new measures.

STØTEK will have focus on reducing the Corona infection and at the same time do our best to help our customers with support and spare parts as normal as possible.

We have implemented several initiatives which will be effective until the transmission curve has been broken.

We have within STØTEK decided:

- Our employees, who have the opportunity, work from home.
- We keep phones open as usual so our customers can get support and order spare parts, etc.
- If possible, our sales representatives will have phone meetings instead of going on customer visits.
- Our production is running close to normal, but we have implemented several initiatives to reduce the risk of infection.
- We still ship and receive goods as usual in our warehouse but encourage our customers and suppliers not to come to our factory or office.
- The situation may change from hour to hour, and we will keep everyone informed about the situation.

If you have any questions, please feel free to contact our team at STØTEK.

We hope for the best and STØTEK will do everything to help in this situation.
